J. nat. Rubb. Res.

Published in 1991 by the Rubber Research Institute of Malaysia
(A Statutory Agency under the Ministry of Primary Industries)
Printed by Percetakan Sinar Suria

CONTENTS

Page

PART 1

Role of Some Non-rubber Constituents on Thermal Oxidative Ageing of Natural Rubber 1
H. Hasma and Alias bin Othman

Relationship between Mooney Measurements and Die Swell of Natural Rubber 9
C.L. Lim and E.L. Ong

Refractive Index Increments of Natural and Synthetic Polysioprenes 20
W.S. Fulton and K.N.G. Knight

Peroxide Prevulcanisation of Natural Rubber Latex 27
Ma'zam Md. Said, T.D. Pendle and D.C. Blackley

Effect of Process Aids on Surface Friction of Raw Rubber 41
E.L. Ong and A.D. Roberts

Clonal Characterisation of Latex and Rubber Properties 52
Esah Yip

PART 2

The Brown Bast Syndrome of *Hevea* Part I. Morphological Observations 81
J.B. Gomez and H. Ghandimathi

The Brown Bast Syndrome of *Hevea* Part II. Histological Observations 90
J.B. Gomez, Samsidar Hamzah, H. Ghandimathi and L.H. Ho

Breeding Horizontal Resistance to South American Leaf Blight of Rubber 102
N.M. Simmonds

Page

Composition and Cure Behaviour of Skim Block Natural Rubber 114
G.M. Bristow

Graft Copolymers of *cis*-1, 4-Polysioprenes with Poly(methyl methacrylate) 135
D.S.Campbell and P.K. Seow

A Stress-strain Relationship for Filled Rubber 144
Alias bin Othman and M.J. Gregory

PART 3

Crosslink Distribution in Vulcanised Blends of NR and EPDM 157
P. S. Brown and A.J. Tinker

Some New Concepts in the Stabilisation of Polymers 163
Gerald Scott

Slow Crystallisation of Natural Rubber Latex 178
G.D. Wathen and A.N. Gent

The Mooney Viscosity of Raw Natural Rubber 182
G.M. Bristow

Adherence, Friction and Contact Geometry of a Rigid Cylinder Rolling on the Flat and Smooth Surface of an Elastic Body (NR and SBR) 199
M. Barquins

Nitrogen Removal from Latex Concentrate Effluent Using the Anoxic/Oxidation Ditch Process: A Laboratory Study 211
Nordin bin Ab. Kadir Bakti

A Modified Procedure for Foliar Sampling of *Hevea brasiliensis* 224
C.H.Lau, C.B.Wong and H.C. Chin

Lutoids of *Hevea* Latex: Morphological Considerations 231
J.B. Gomez

Page

PART 4

Structural Characterisation of Naturally Occurring *Trans*-polysioprenes 241
Yasuyuki Tanaka, Makio Mori, Atsushi Takei, Ploenpit Boochathum and Yoshinori Sato

Relationships between Structure and Performance of Vulcanisates 246
D.S. Campbell and A.V. Chapman

A Facile Reaction of Sulphenamide Accelerators with Acetone 259
A.V. Chapman

Accelerated and Long-term Ageing of Natural Rubber Vulcanisates Part 2: Results from Ageing Tests at 40°C 266
L.R. Barker

Comparison of Free Fatty Acid Values with Individually Determined Organic and Inorganic Acid Concentrations in the Extracts of Malaysian Natural Rubber 275
R.C. Crafts, J.E. Davey, G.P. McSweeney and I.S. Stephens

Factors Affecting the NMR Technique for Estimation of Crosslink Density in Rubber Blends 286
P.S. Brown and A.J. Tinker

Fixation of Methacrylic Acid onto Epoxidised Liquid Natural Rubber 296
D. Derouet, J.C. Brosse and L.M.K. Tillekeratne

AUTHOR INDEX

The number of each Part is indicated in **bold**.

Alias bin Othman and Gregory, M.J. **2** 144
Alias bin Othman *see* Hasma, H.

Andean potatoes **2** 111, 112
Aninsaldehyde **1** 30
Anions determined in latex samples **4** 278, 280
Anoxic reactor **3** 211
Anoxic/oxidation ditch process **3** 211
Antioxidant 2246 **1** 38
Antioxidant
catalytic antioxidant **3** 165
chain-breaking acceptor **3** 164
phenolic antioxidant **3** 164
Arginine **1** 76

Aromatic nitroso compounds **3** 172
Arrhenius plot **4** 269
Arylaminyl radicals **3** 168
Ascorbic acid **1** 30
Azodicarboxylate **4** 289
characterisation **2** 137
coupling process **2** 137
functional groups **2** 135

B-serum proteins **1** 1, 2, 6, 7
Balata **4** 241
Bark cracking **2** 82, 87
Bark dryness **2** 91, 92, 93
Bark sloughing **2** 82, 87, 92
Barus effect **1** 9
Benzalnitrones anti-fatigue activity **3** 173
Benzothiazol-2-ylthio groups **4** 262
Benzothiazole carbons **4** 262
Benzothiazolyl **4** 262
Benzothiazolylthio **4** 259
Benzothiazolylthiopropan **4** 259
Benzoyl chloride **4** 261
Benzyltrimethyl ammonium chloride **1** 29
Biosynthesis of latex **2** 97
1-*bis*-(2'-*benzothiazolythio*)-2-*cyclo-hexylaminoprop*-1-*ene* **4** 260
1,1-*bis*-(2'benzothiazolylthio)-2-cyclohexyl-aminoprop-1-ene(2)
hydrolysis of **4** 262
1,1-bis-(2'-benzothiazolylthio propan-2-one **4** 263
1,3-bis (2'-benzothiazolythio) propan **4** 261
1,3-bis-(2'-benzothiazolylthio) propan-2-one **4** 263
1,3-dibutyl-2-thiourea **1** 30
bis-2-ethylhexyl peroxydicarbonate **1** 28, 29
Blends
crosslink density in rubber **4** 286
NMR techniques **4** 286
NR and EPDM **5** 157
of natural rubber **2** 123
Boron trifluoride **4** 277
Breeding **2** 102
Breeding Horizontal Resistance to South American Leaf Blight of Rubber **2** 102
Brice-Phoenix Differential Refractometer **1** 22
Bromothymol blue **4** 277

Brown bast
in Java **2** 81
with xylem nodules **2** 82
syndrome of *Hevea* **2** 81, 90
Brownian motion **3** 231
Bulk rubber properties **1** 62

^{13}C NMR spectra **4** 262
^{13}C-NMR spectrum of low molecular weight *trans*-polyisoprene **4** 244
^{13}C-NMR spectrum of *trans*-polyisoprene **4** 243
C-S i.r. absorption **4** 263
Cadmium diisopropyl thiophosphate **1** 38
2-carbethoxyazo-carbonyl chloride **2** 136
2-carbethoxyhydrazinecarbonyl chloride **2** 136
Cariflex IR305 polyisoprene grafting of functional polymer **2** 138
Catechol **1** 30
Cauchy dispersion **1** 23
CBM **4** 259
CBS reaction
of 2'-benzothiazolylthiopropan (1) **4** 261
with acetone **4** 260
Characterisation
of azodicarboxylate **2** 137
of hyrdoxyl **2** 137
of filled networks **4** 257
of trans-*polyisoprenes* **4** 241
Chemical crosslink density in gum **4** 246
Chemical crosslink structure **4** 246
Chicle latex **4** 241
Chicle resin **4** 241, 242
Chloroform **4** 291
Choline **1** 76
Cis-1, 4-polyisoprene **2** 135
Cis-BR vulcanisates formulations **4** 288
Cis-polybutadiene **4** 286
Cis-polyisoprene **4** 241, 286
accelerated sulphur **4** 290
formulations of vulcanisates **4** 288
from the leaves of Sunflower **4** 245
Clonal Characterisation of Latex and Rubber Properties **1** 52
Clones
classification of **1** 53
parentage **1** 54,59
CNSAM 7701 **2** 104

Coefficients of correlation
mooney measurements and die swell **1** 11, 12, 16, 19
mooney recovery and die swell **1** 14, 15
Colletotrichum gloeosporioides **2** 111
Comparison of Free Fatty Acid Values with Individually Determined Organic and Inorganic Acid Concentrations in the Extracts of Malaysian Natural Rubber **4** 275
Composition and Cure Behaviour of Skim Block Natural Rubber **2** 114
Contact Apparatus and Solids in Contact **3** 203
Contact Equilibrium Static Contact Results **3** 204
Contact geometry of a rigid cylinder rolling on an elastic solid **3** 201
Contact
rolling contact **3** 202, 204
static contact **3** 202
total contact length *versus* rolling speed **3** 206
Copper content
in NR **1** 3, 4, 5
determination **1** 2, 3
Correlation
between stress and strain **2** 148
between vulcanisate modulus and rheometer torque measurements **1** 76
between Mooney viscosity and Wallace plasticity **1** 64
between Mooney viscosity and storage hardening **1** 65, 67
between viscosity and Wallace plasticity **1** 64–66
Correlation coefficients
for filled rubbers **2** 151
of rubbers filled with N347 **2** 151
Correlation of strength properties with crosslink type **4** 250
Cronartium rusts **2** 112
Crosslink density
in gum crosslink **4** 246
chemical crosslink **4** 246
in rubber blends **4** 286
for NR vulcanisates **4** 293
Crosslink Distribution in Vulcanised Blends of NR and EPDM **3** 157
Crosslink structure chemical crosslink **4** 246
Crosslinking influence of chemical crosslinking on properties **4** 250
Crosslinks
di- and polysulphide properties of rubber network **4** 255
monosulphide crosslinks **4** 257
polysulphide crosslinks **4** 246, 257
Crown breeding **2** 104
Crystallisation
low-temperature **4** 256
of NR latex **3** 178
Cure behaviour
practical formulations **2** 118

characteristics and rheometric measurement **1** 70, 71
influence of natural fatty acid **2** 114
influence of protein content **2** 114
Cure system
accelerated-sulphur **4** 286
effects **4** 286
Curing systems
EV **4** 266
semi-EV **4** 266
Novor/sulphur **4** 266
Cyclo-hexylammonium benzothiazole-2-thiolate **4** 287
Cyclohexane **1** 21, 23; **4** 260
Cyclohexyl ammonium salt **4** 260
Cyclohexylamine **4** 259, 261
Cyclohexylaminoprop-l-ene **4** 259
Cyclohexylammonium **4** 251
Cyclohexylammonium salt **4** 259
Cyclohyxylamine **4** 259
Cystine **1** 76

Debye-Scherrer patterns **3** 180
Deformation
compression **2** 144
simple shear **2** 144
uniaxial extension **2** 144
Denitrification **3** 211
Deproteinised natural rubber **2** 118
Deutero-chloroform **4** 287
1,3-dibutyl-2-thiourea **1** 30
Di-isopropylazodicarboxylate **4** 287
Di-t-butyl peroxide **1** 29
Di-t-butyl peroxyketal **1** 29
Dichloromethane **1** 21; **4** 260, 261
Didecanoyl peroxide **1** 28, 29
Die swell relationships **1** 11
Diethyl ether **4** 263
Dimethylallyl pyrophosphate **4** 245
Dioctanoyl peroxide **1** 28, 29
Discolouration of raw rubber **1** 69
Disulphide **4** 257
Dupre's energy of adhesion **3** 204
Dutrex 729 **1** 41

EDTA **1** 38
Effect of Process Aids on Surface Friction of Raw Rubber **1** 41
Effluent nitrogen removal from latex concentrate **3** 211

Elasticity
plane elasticity theory **3** 199
plane elasticity theory application and contact geometry **3** 201
Enamine **4** 260, 263
EPDM chemical modification and subsequent ionomer formation **3** 159
Epoxidised liquid natural rubber fixation of methacrylic acid **4** 296
Ester alkyl groups **2** 135; **4** 241
Ethanolamine **1** 76
Etheral **4** 261
Ethylene glycol **3** 178, 180
Ethylidine norbornene **3** 157
Exploitation **2** 81
Extrusion stress of SMR L with oils **1** 50

Facile Reaction of Sulphenamide Accelerators with Acetone **4** 259
Factors Affecting the NMR Technique for Estimation of Crosslink Density in Rubber Blends **4** 286
Fatigue lives
of NR vulcanisates containing amines **3** 171
of peroxide cured NR **3** 174
Fatigue spin traps as anti-fatigue agents **3** 172
Fatty acid
content **4** 275
methylated fatty acid **4** 277
Fatty acids **1** 76
Ferric ion-pyrophosphate **1** 34
FFA **4** 275
Field latex properties **1** 55
Fixation of Methacrylic Acid onto Epoxidised Liquid Natural Rubber **4** 296
Flory-Rehner equation **4** 294
Flory-Rehner relationship **4** 248
Foliar sampling

aromatic nitroxyls **3** 167
catalytic mechano-antioxidant activity
nitroxyl radicals as anti-fatigue agents **3** 167
NMR
spectra restriction of swelling **4** 287
technique for estimation of crosslink density in rubber blends **4** 286
NN-dimethyl-p-toluidine **1** 30
Novor/sulphur curing systems **4** 266
NR/EPDM blends **3** 157
Nutrient composition **3** 224
Nutritional status of *Hevea* leaves **3** 224
Nylon 6 **3** 178

Octadecylsilica gel **4** 260
Olefins **3** 174; **4** 255, 285
Oleic acid **4** 275
Oligomers **3** 168
Osmium tetroxide **2** 91; **3** 233
Overcure effects of addition of skim rubber **2** 133
Oxidation **3** 211
Oxidation of *cis*-polyisoprenyl radicals by nitroxyl **3** 171

p-hydroxydiphenyl **1** 30
p-hydroxyethoxy benzaldehyde **1** 30
Palaquium gutta **4** 241
Palmitic acid **4** 275
Panel drying **2** 82
Peroxide Prevulcanisation of Natural Rubber Latex **1** 27
Peroxide-cured N550 black filled rubbers **2** 152
Peroxide-cured rubbers **2** 151
Peroxydicarbonate **1** 29
Peroxyester-fructose-ferric Ion Systems **1** 34
Phenolphthalein **4** 275, 277
Phenylhydrazine/oxygen system **4** 296
Phenylphosphinic acid **1** 30
Phloroglucinol **2** 91, 93
Phospholipids **1** 76
Phosphotungstic acid **3** 233
Photo-sensitive polymers **4** 296
Piperidinoxyls **3** 167
Plasmalemma **3** 233

Poly(isoprene-g-styrene) **2** 137
Poly(methyl methacrylate) **2** 135
Polyisoprenyl pyrophosphate **4** 245
Polymer chains secondary modifications **4** 255
Polymethylmethacrylate **1** 42; **3** 199
Polyolefins **3** 172
Polypropylene
catalytic effect during processing **3** 163
surface friction of **1** 41
unsaturation and torque during processing **3** 166
Polysulphide **4** 257
Polysulphide crosslinks **4** 246, 251
Polysulphidic bonds **4** 253
Potassium hydroxide (KOH) number **1** 53
Potassium oleate **1** 27
Procedure for foliar sampling **3** 224
Process aids
on surface friction of raw rubber **1** 41
types of **1** 42
Prolutoids **3** 232
Propan-2-ol **4** 275
Proton transfer **4** 264
Puccinia polysora **2** 112
Pyridine as catalyst **4** 296

Quinol **1** 30
Quinonoid compounds **3** 164
Quintana-Roo **4** 242

R-genes **2** 104
Reactor anoxic reactor **3** 211
Redox Systems as mechano-antioxidants **3** 168
Refractive Index Increments of Natural and Synthetic Polyisoprenes **1** 20
Refractive index increment
of linear polyisoprene in tetrahydrofuran **1** 22
of natural rubbers in tetrahydrofuran **1** 22
for natural and synthetic polyisoprenes in tetrahydrofuran **1** 24
Relationship between Mooney Measurements and Die Swell of Natural Rubber **1** 9
Relationships between Structure and Performance of Vulcanisates **4** 246
Resistance genetic variance of **2** 105
Rheometry capillary rheometry **1** 46
Role of Some Non-rubber Constituents on Thermal Oxidative Ageing of Natural Rubber **1** 1

Rolling resistance **3** 199
